ENVIRONMENT MANAGEMENT AND COMPLIANCE IN BUILDING AND CONSTRUCTION SECTOR

The **COVID19** pandemic has forced us to do things differently in almost every aspect of our lives. Training and capacity building, which is essential for continuous learning and innovation, will also have to change.

We at the **International Forum for Environment, Sustainability and Technology (iFOREST)** in collaboration with **Sustainability Innovations and Advisories (SIA) Private Limited** (our knowledge partner) have developed a new innovative methodology to conduct an online training programme on

Environment Management and Compliance in Building and Construction Sector (1st to 5th December 2020)

Building and construction sector is a fast-growing sector in India. Most of the developers face legal roadblock due to lack of capacity of various environmental, social, health and safety clearances, permits and NOCs are applicable on a project under different statutes, including environmental management during the construction and operation stages of project development.

The core of our innovative on-line method of training is:

Andragogy: Our training is designed for adult e-Learning. We use a mix of online lecture, assignments, discussion and demonstration to transfer knowledge and skills effectively.

Learning on the job: Our training programmes are customised so that a participant needs to devote only 3 hours a day on training (3 hours lecture & class exercise and home assignment). This allows the participant to manage training and job together.

Individual learning and assessment: The training programmes are tailored for a small group (25-30 participants) to enable personalized learning and assessment.

Online demonstrations and videos: We enhance learning through online demonstrations and customized videos.

Training Fees:

₹2,500
per participant
students, academia
and NGOs

₹4,500
per participant for industry,
regulators, consultants,
government

Date:

1st to 5th December 2020

Timing of training:

2 pm to 5 pm, 3-hour lecture & class exercise + Home assignment

Who can apply:

Developers, Architect, Environmental planner, industries, Academia, NGOs, Students

Course Highlights

● **Applicable clearance, permits and clearance applicable on Building and Construction sector**

- Environmental clearance process as per EIA notification 2006
- Process of obtaining groundwater, forest clearance, NOC from pollution control board, airport and defence clearance, fire NOC, etc

● **Environmental best practices**

- Water conservation, treatment, recycle and reuse, low cost treatment technology, cost and land requirement
- Wastes management options, treatment, design and cost
- Labour compliance as per different statutes
- Health and safety
- Improving energy efficient and reducing carbon footprint
- Rainwater harvesting - concept, design and cost
- Solar energy harvesting – concept, design and cost
- Air pollution control management
- Landscaping and improving green covers

● **Examples** - Environment & Social due diligence practices adopted by the Indian Banks for project financing

Training Methodology

Lecture, videos, Live demonstration, Q&A sessions, Group discussion and Assignments
